

FIVE THINGS YOU SHOULD KNOW ABOUT SOUTH KOREA'S DOG MEAT INDUSTRY:

1. South Korea is the only country known to intensively 'farm' dogs for their meat.
2. At this moment, over two million dogs are confined on dog meat farms, suffering physically and mentally.
3. All breeds of dogs are slaughtered for their meat, including surplus dogs from the pet industry.
4. Dogs caught up in the industry live miserable lives and suffer unimaginable brutality when they are slaughtered.
5. Change For Animals Foundation is committed to securing an outright ban on the dog meat industry – we will not give up until it ends for good.
